CONSERV-A-STOR

... a unique new file storage system that takes the lifting and lugging out of semi-active record filing and retrieval

Here's a semi-active records storage system that's so easy to use even the tiniest girl in your office can use it without ever lifting or lugging a single file box.

The Fidelity Conserv-A-Stor unit consists of six tiers of individual metal carriers, each designed to hold a transfer file full of letter or legal size files. Each tier has three carriers mounted on rollers for easy lateral movement. To reach the "right" file simply move adjacent carriers to the right or left for instant, unobstructed access to contents.

Offers Convenient Storage for 19 Legal/Letter Size Files

Nineteen "instant set-up" corrugated fiberboard transfer files provide plenty of storage space for letter or legal size documents. Three protective covers are included for dust-proofing the top tiers of files. For immediate identification of contents, files are clearly indexed on front and side panels.

TRY IT FREE FOR 15 DAYS!

The only way for you to be sure the Fidelity Conserv-A-Stor can improve your record retrieval system is to try it in your own office. And you can do just that FREE for 15 days. Fill out the enclosed Free Trial Certificate and drop it in the mail.

REMEMBER, IT DOESN'T COST YOU A PENNY UNLESS YOU DECIDE TO KEEP IT. SO MAIL YOUR ORDER TODAY.
